

Day 3 - Assignment

Create a table for shopping and update the product price based on the product name.

After creating table add column for product id and set data type as INT

Display the output

```
create table Shopping2 (  
product_Price int,  
product_Name Varchar(20)  
);  
insert into Shopping2 values (10000,'Mobile'),  
(3000,'Headphone');  
set sql_safe_updates = 0;  
update Shopping2 set product_price=15000  
where product_Name='Mobile';  
alter table Shopping2 add product_ID int;  
select * from Shopping2;
```

Output:

```

23
24 • create table Shopping2 (
25     product_Price int,
26     product_Name Varchar(20)
27 );
28 • insert into Shopping2 values (10000,'Mobile'),
29     (3000,'Headphone');
30 • set sql_safe_updates = 0;
31 • update Shopping2 set product_price=15000
32     where product_Name='Mobile';
33 • alter table Shopping2 add product_ID int;
34 • select * from Shopping2;
35

```

	product_Price	product_Name	product_ID
▶	15000	Mobile	NULL
	3000	Headphone	NULL
